

Digital Transformation of campus processes, right from admission to result collection was enabled through TCS iON solutions for University of Cyberjaya and affiliated colleges.

## Overview

- University of Cyberjaya offers more than 50+ programs, including undergraduate, postgraduate-taught and postgraduate-research programs across a wide set of disciplines with strength in the medical sciences and alternative medicine.
- The University, together with its affiliated institutions currently have a student population of over 7,000

## Challenges

- Unable to track Student information due to segregated systems
- Improper Data Management leading to poor planning and insights
- Lecturers/ Employees struggling with manual operations for day-to-day course planning

## Solution Delivered

- Implemented TCS iON Digital Campus to digitize entire University Processes.
- Admissions to Graduation, all in one platform
- 9000+ Students enabled on the platform with access to Digital Learning
- Student lead management managed on TCS iON platform
- Dashboards and Analytics for better response and service.

## Value Created

- End to end student life cycle management
- Bring uniformity in the processes of all different programs of the University.
- Strong department authorization and better visibility of the process to all the stakeholders.
- Digitized processes for Students, lecturers and employees to carry out all operations from a centralized platform
- Generate relevant analytics to optimize processes thereby reducing significant time and cost
