

# Examcraft | TCS iON Digital Marking

TCS iON empowered Examcraft by providing an end-to-end marking platform that significantly reduced their marking efforts and time required in conducting their State Examination Commission Junior Cycle and Leaving Certificate examinations CS

## Challenges

- Examcraft offers mock examination service to schools in Ireland. They also handle the marking of these mock assessment papers. The marked sheets are then shared with students for analysis.
- Huge costs and time was spent in manual process marking of assessment papers.
- These tedious manual marking processes also led to delays.
- Managing reverse logistics of answer sheets to markers was cumbersome and prone to errors.

## Solution delivered

- End-to-end marking platform to manage the following-
- School and student registration
- Scan Answer Booklet (AB)
- Online correction
- Teacher and student dashboard
- TCS iON has partnered with local scanning vendor for Scanning of the answer booklets (AB)

## Value Created

- Reduction of overall turnaround time from 18 days to 5 days.
- Elimination of logistics and thereby the errors & cost involved.
- Local scanning vendor present in Ireland to optimize time and cost.
- Elimination of totaling errors and reduction in re-evaluation requests.
- Digitized marking enabled for Junior Cycle and Leaving Certificate for over 250k+ exams across 400 schools.
