

KOMINFO | Digital Learning for Schools

TCS iON partnered with Indonesia Government for a Country Wide Digital transformation for learning at about 250K Schools.

Challenges

- Indonesian Education IT solution across ministries and agencies work in silo and are disconnected
- Digital divide and lack of uniformity across 17k islands of Indonesia.
- Impact of pandemic furthering the ministry's attempt to bridge the divide
- Lack of right technology for learning and education management

Solution delivered

- End-to-end integrated Digital Learning solutions rolled out to schools throughout the country.
- Uberization of content to make learning available to all
- Encourage Schools to register (participation), embed teacher-educators training (certification) & engage students to explore (community-led learning)
- Applications made compliant with country's 2013 curriculum requirement for K12

Benefits

- Providing standardized delivery of nation-led curriculum, across different school systems
- National Rollout of multilingual (Bahasa Indonesia) application with Innovative architecture
- Laid out Technology Design for serving 300k schools with assimilation of technology and digital initiatives
