

# NOCN | Digital Assessment with Remote Proctoring

TCS iON and NOCN collaborated for intuitive “Assessment of Learning” of candidates to become competent in this digital age.

## Challenges

- NOCN had multiple platforms for conducting assessments and lacked centralized control over student assessments.
- The different platforms did not interact with each other to allow data transfer seamlessly.
- Integrable systems to enable seamless data flow between the existing platforms
- One centralized platform with features enabled according to specific user groups

## Solution delivered

- End to end assessment solution delivered for 200K+ candidates
- Remote Assessments with AI based proctoring
- Integrations with existing system like Quartz
- Customized Candidate Feedback report

## Value Created

- Single solution for end-to-end assessment management.
- Interactive elements for tackling hands-on and vocational competencies.
- Improved candidate experience.
- Less workarounds for centres and candidates.
- A total of 4500 items and 75 assessments created on the platform by NOCN.
